Contents

1. Effect of lime on some physical properties of mud as an alternative refractory material for lining of furnaces, by Katsina C. BALA and Reyazul H. KHAN ..........................................................p. 1-9

4. Effects of manganese on corrosion behaviour of welded Al-Fe-Si alloy in NaCl medium, by Isiaka O. OLADELE, Oluyemi O. DARAMOLA, Lawrence O. SALIU .................................................................p. 36-45

7. Design and analysis of microstrip slot array antenna configuration for bandwidth enhancement, by Duvvuri S. RAMKIRAN, Boddapati T. P. MADHAV, Nimmagadda HARITHA, Ravuri S. RAMYA, Kalyani M. VINDHYA and Sai P. ABHISHEK ...........................................p. 72-83

8. Aluminium alloy - rice husk ash composites production and analysis, by Abdullahi M. USMAN, Abdulkabir RAJI, Nuhu H. WAZIRI and Mudathir A. HASSAN..................................................p. 84-98

10. Effects of selected casting methods on mechanical behaviour of Al-

12. Comparison of different forms of gravel as aggregate in concrete, by Sikiru ORITOLA, Abd. Latif SALEH and Abdul R. MOHD SAM........p. 135-144

14. The design of a low-cost device for the production of hydrogen, by Amal NASSAR and Eman NASSAR ......................................................p. 158-165

15. Electrochemical determination of phenol at natural phosphate modified carbon paste electrode, by Tarik EL OUAFY, Abdelilah CHTAINI, Hassan OULFAJRITE and Rachida NAJIH.........................p. 166-178

16. Review on phase change materials for building applications, by Lavinia SOCACIU, Angela PLEȘA, Paula UNGUREȘAN, and Oana GIURGIU ..................................................................................................p.179-194

17. Production of activated carbon from Atili seed shells, by Nehemiah S. MAINA, and Agnes A. ANUKA.................................................p. 195-209

18. Effect of welding process, type of electrode and electrode core diameter on the tensile property of 304L austenitic stainless steel, by Akinlabi OYETUNJI and Nwafagu NWIGBOJI............................................p. 210-222

19. Investigating the influence of alkalization on the mechanical and water absorption properties of coconut and sponge fibers reinforced polypropylene composites, by Okikiola G. AGBABIKA, Isiaka O. OLADELE and Paul T. OLORUNLEYE ..................................................p. 223-231

21. Evaluating the biogas yield and design of a biodigester to generate cooking gas from human faeces, by Olawale S. ISMAIL and Opeyemi S. ADEWOLE ..................................................................................p. 232-241

22. Ranking the types of intersections for assessing the safety of pedestrians using TOPSIS method, by Călin ȘERBU, Dan OPRUȚA
23. **The effect of plate heat exchanger’s geometry on heat transfer**, by Oana GIURGIU, Angela PLEŞA and Dan OPRUŢA ........................................p. 254-263

24. **Formal models of nouns in the Kazakh language**, by Assel MUKANOVA, Banu YERGESH, Gulmira BEKMANOVA, Bibigul RAZAKHOVA and Altynbek SHARIPBAY ........................................p. 264-273
